CONTENTS OF VOLUME 60

Numbers 1–2

J. Hubbell and A. Miller — 1 Editorial

2 Curriculum Vitae of Prof. László Wojnárovits

RADIATION PHYSICS

Mahmoud I. Abbas — 3 A direct mathematical method to calculate the efficiencies of a parallelepiped detector for an arbitrarily positioned point source

E. Tıraşoğlu, U. Çevik, B. Ertuğral, Y. Atalay and A. İ. Kopya — 11 Measurements of L_ℓ, L_γ, L_η, L_β and L_γ X-ray fluorescence cross-sections in $70 \leqslant Z \leqslant 92$ elements excited by 59.543 keV photons

A. B. Hallak — 17 Effect of fluorescence and Coster–Kronig yields on L X-ray emission cross-sections by impact of 2 MeV $^4He^{2+}$ ions

Technical notes

L. Gerward, N. Guilbert, K. Bjørn Jensen and H. Levring — 23 X-ray absorption in matter. Reengineering XCOM

Ö. Kabadayi and H. Gümüş — 25 Calculation of average projected range and range straggling of charged particles in solids

Book review — 33

RADIATION CHEMISTRY

F. Z. Cui, Y. B. Lin, D. M. Zhang and M. B. Tian — 35 Irradiation effects on secondary structure of protein induced by keV ions

M. C. R. Symons — 39 Hole centres in mangesium oxide

Maurizio Tamba and Armida Torreggiani — 43 Physico-chemical and biological properties of ambroxol under irradiation

Norihiko Fujita, Chihiro Matsuura and Kazuhiko Saigo — 53 Radiation-induced preferential dissolution of specific planes of carbon steel in high-temperature water

D. B. Naik, G. R. Dey, P. Dwibedy and K. Kishore — 61 Pulse radiolysis studies on 8-hydroxyquinoline 5-sulphonic acid in aqueous solutions

Letter to the editor — 71

RADIATION PROCESSING

Guillermina Burillo, Martha Galicia, Maria del Pilar Carreón, Margarito Vázquez and Esbaide Adem — 73 Crosslinking of recycled polyethylene by gamma irradiation in the presence of sensitizers

Phil Hyun Kang and Young Chang Nho — 79 The effect of γ-irradiation on ultra-high molecular weight polyethylene recrystallized under different cooling conditions

V. Švorčík, V. Hnatowicz, P. Stopka, L. Bačáková, J. Heitz, R. Öchsner and H. Ryssel — 89 Amino acids grafting of Ar^+ ions modified PE

Akihiro Oshima, Akira Udagawa and Yousuke Morita — 95 Radiation processing for carbon fiber-reinforced polytetrafluoroethylene composite materials

B. Whittaker and M. F. Watts — 101 The influence of dose rate, ambient temperature and time on the radiation response of Harwell PMMA dosimeters

Julian J. Murphy and Richard G. Jones — 111 Application of the Charlesby model to the radiation-induced chain reaction cross-linking of oxirane functionalised polymers

Todd M. Alam, Mat Celina, Roger A. Assink, Roger L. Clough and Kenneth T. Gillen 121 ^{17}O NMR investigation of oxidative degradation in polymers under γ-irradiation

Mohd. Hilmi Mahmood, Zahid Abdullah, Yasuo Sakurai, Khairul Zaman and Hj. Mohd. Dahlan 129 Effects of monomers on the properties of palm-oil-based radiation curable pressure sensitive adhesives (PSA) — a prepolymer method

Wang Jinhua, Fumio Yoshii and Keizo Makuuchi 139 Radiation vulcanization of ethylene–propylene rubber with polyfunctional monomers

Technical note

M.A. Ghelawi, J.S. Moore, R.H. Bisby and N.J.F. Dodd 143 Estimation of absorbed dose in irradiated dates (*Phoenix dactylifera* L.). Test of ESR response function by a weighted linear least-squares regression analysis

Number 3

RADIATION PHYSICS

F. Alouani-Bibi, V. T. Lazurik, Yu. V. Rogov and T. Tabata 151 Charge-deposition in two-layer systems irradiated by electrons

Technical note

Chuck D. Harmon, Wayne H. Smith and David A. Costa 157 Criticality calculations for plutonium metal at room temperature in ionic liquid solutions

Letter to the editor 161 A database for electron–material interactions

RADIATION CHEMISTRY

Jin-Ling Miao, Wen-Feng Wang, Jing-Xi Pan, Chang-Yuan Lu, Rong-Qun Li and Si-De Yao 163 The scavenging reactions of nitrogen dioxide radical and carbonate radical by tea polyphenol derivatives: a pulse radiolysis study

E. Kalecińska, J. Kaleciński and M. Krowicka 169 The influence of radiation on Rh(III) tetrasulfophthalocyanine in water–alcohol solutions

G. R. Dey, D. B. Naik, P. Dwibedy and K. Kishore 173 Kinetic and spectral properties of intermediates formed during pulse radiolysis of 2,6-pyridinedicarbonyl dichloride in aqueous solutions

RADIATION PROCESSING

E. M. EL-Bazza Zeinab, A. Farrag Hala, E. D. Z. EL-Fouly Mohie and Y. M. EL-Tablawy Seham 181 Inhibitory effect of gamma radiation and *Nigella sativa* seeds oil on growth, spore germination and toxin production of fungi

Nicola D. Yordanov and Boryana Mladenova 191 EPR studies on gamma-irradiated snails hard tissues

M. S. Adeil Pietranera and P. Narvaiz 195 Examination of some protective conditions on technological properties of irradiated food grade polysaccharides

D. Saraydin, E. Karadağ, Y. Çaldiran and O. Güven 203 Nicotine-selective radiation-induced poly(acrylamide/maleic acid) hydrogels

R. F. Zaykina, Yu. A. Zaykin, T. B. Mamonova and N. K. Nadirov 211 Radiation-thermal processing of high-viscous oil from Karazhanbas field

I. Medina Rojas and M. J. Thomson 223 High-temperature radiation-induced removal of gaseous air pollutants

Bahattin Aydinli and Teoman Tinçer 237 Radiation grafting of various water-soluble monomers on ultra-high molecular weight polyethylene powder: Part I. Grafting conditions and grafting yield

Numbers 4–5

INTERNATIONAL SYMPOSIUM ON PROSPECTS FOR APPLICATION OF RADIATION TOWARDS THE 21ST CENTURY

	245	Preface
Yoneho Tabata	247	Welcome and opening address

ION BEAM APPLICATION

Jay A. La Verne, Z. Chang and M.S. Araos	253	Heavy ion radiolysis of organic materials
Shin-ichi Ohno, Katsutoshi Furukawa, Mitsumasa Taguchi, Takuji Kojima and Hiroshi Watanabe	259	An ion-track structure model based on experimental measurements and its application to calculate radiolysis yields
Mitsumasa Taguchi, Kazuki Hayano, Yujie Xu, Masahiro Moriyama, Yasuhiko Kobayashi, Hiroshi Hiratsuka and Shin-Ichi Ohno	263	Yields of tyrosines in the radiolysis of aqueous phenylalanine solutions by energetic heavy ions
Toshio Hirao, Hisayoshi Itoh, Sohei Okada and Isamu Nashiyama	269	Studies of single-event transient current induced in GaAs and Si diodes by energetic heavy ions
Hidenobu Mori, Toshio Hirao, Shinobu Onoda, Hisayoshi Itoh, Sohei Okada, Tsuyoshi Okamoto and Yoshiharu Koizumi	273	Profiling of collimated swift ion microbeam using 16 M bit DRAM
Hiromi Shibata, Koichi Kobayashi, Takeo Iwai, Yoshimi Hamabe, Sho Sasaki, Sunao Hasegawa, Hajime Yano, Akira Fujiwara, Hideo Ohashi, Toru Kawamura and Ken-ichi Nogami	277	Microparticle acceleration by a Van de Graaff accelerator and application to space and material sciences

PRIMARY PROCESSES

(1) Fundamental Physics

Mitio Inokuti	283	Scientific legacy of Robert L. Platzman. Preliminary report
Norio Saito and Isao H. Suzuki	291	Photon *W*-value for Ar in the sub-keV X-ray region
V. M. Byakov, S. V. Stepanov and O.P. Stepanova	297	Role of ionizing radiation in the natural history of the Earth

(2) Ultrafast Processes

Mitsuru Uesaka, Takahiro Watanabe, Tetsuya Kobayashi, Toru Ueda, Koji Yoshii, Guozhong Wu, Xifeng Li, Yusa Muroya, Jun Sugahara, Kenichi Kinosita, Nasr Hafs, Hiroyuki Okuda, Teppei Nishihara, Yohei Terada, Kazuhisa Nakajima and Yosuke Katsumura	303	Hundreds- and tens-femtosecond time-resolved pump-and-probe analysis system
Y. Muroya, T. Watanabe, G. Wu, X. Li, T. Kobayashi, J. Sugahara, T. Ueda, K. Yoshii, M. Uesaka and Y. Katsumura	307	Design and development of a sub-picosecond pulse radiolysis system
Y. Yoshida, Y. Mizutani, T. Kozawa, A. Saeki, S. Seki, S. Tagawa and K. Ushida	313	Development of laser-synchronized picosecond pulse radiolysis system
Akinori Saeki, Takahiro Kozawa, Yoichi Yoshida and Seiichi Tagawa	319	Study on geminate ion recombination in liquid dodecane using pico- and subpicosecond pulse radiolysis

(3) Kinetics

Rolf E. Bühler	323	Drastic differences in geminate ion kinetics, dependent on anion lifetimes
Takashi Sumiyoshi, Shohei Ueta and Sadashi Sawamura	331	Kinetics and mechanism of reactions of 9-xanthenyl and 9-thioxanthenyl radicals in halocarbons
L. Wojnárovits, E. Takács, K. Dajka, M. D'Angelantonio and S. Emmi	337	Pulse radiolysis of acrylamide derivatives in dilute aqueous solution
Xifeng Li, Zhongli Cai, Yosuke Katsumura, Guozhong Wu and Yusa Muroya	345	Reactions of reducing and oxidizing radicals with caffeic acid: a pulse radiolysis and theoretical study
Nikola Getoff	351	Cytostatica efficiency enhancement by vitamins C, E and β-carotene under irradiation. State of the art
N. Barbarin and B. Tilquin	359	Study of nonvolatile degradation compounds produced by radio sterilization of cefotaxime
Ryuji Nagaishi	369	A model for radiolysis of nitric acid and its application to the radiation chemistry of uranium ion in nitric acid medium
Shinobu Onoda, Hidenobu Mori, Tsuyoshi Okamoto, Toshio Hirao, Hisayoshi Itoh and Sohei Okada	377	Investigation of radiation degradation of Si and GaAlAs optical devices due to gamma-ray and electron irradiation

PHYSICS AND CHEMISTRY UNDER EXTREME CONDITIONS

Tetsuo Miyazaki, Jun Kumagai and Takayuki Kumada	381	Controlling factors of tunneling reactions in solid hydrogen at very low temperature
Kenzo Hiraoka and Tetsuya Sato	389	Laboratory simulation of tunneling reactions in interstellar ices
Guozhong Wu, Yosuke Katsumura, Yusa Muroya, Xifeng Li and Yohei Terada	395	Pulse radiolysis of high temperature and supercritical water: experimental setup and e^-_{aq} observation
Kenji Takahashi, Nada M. Dimitrijevic, David M. Bartels and Charles D. Jonah	399	Temperature effect on spectrum of solvated electron formed in a mixture of supercritical ethane
S.C. Chemerisov, D.W. Werst and A.D. Trifunac	405	Formation, trapping and kinetics of H atoms in wet zeolites and mesoporous silica

POLYMERIC SYSTEMS

S. Seki, Y. Yoshida and S. Tagawa	411	Radical anions of polysilane derivatives studied by pulse radiolysis
K. Okamoto, T. Kozawa, Y. Yoshida and S. Tagawa	417	Study on intermediate species of polystyrene by using pulse radiolysis
John M. Warman, Matthijs P. de Haas, Laurens D.A. Siebbeles, Andries Hummel, Romano J.O.M. Hoofman and Gerald P. van der Laan	423	The anisotropy of charge transport in pulse-irradiated polymers: from polyethylene to polydeoxyribonucleic acid
Hideo Ohkita, Hironori Ishii, Takeo Ogi, Shinzaburo Ito and Masahide Yamamoto	427	Spatial distribution of electrons ejected by two-photon excitation of aromatic molecules in polymer systems
Mark S. Frahn, John M. Warman, Ruben D. Abellon and Leonard H. Luthjens	433	Monitoring the radiation-induced bulk polymerisation of methyl methacrylate with *N*-(1-pyrene)maleimide
J.S. Forsythe, D. J.T. Hill, S. Mohajerani and A.K. Whittaker	439	Solid state ^{19}F NMR determination of new structure formation in FEP following radiolysis at 300 and 363 K
Sun Jia Zhen	445	The effect of chain flexibility and chain mobility on radiation cross-linking of polymers
Ajit Singh	453	Irradiation of polymer blends containing a polyolefin
Kensaku Maeda, Shu Seki, Seiichi Tagawa and Hiromi Shibata	461	Radiation effects on branching polysilanes
Akihiro Oshima, Akira Udagawa and Yousuke Morita	467	Application of radiation-crosslinked polytetrafluoroethylene to fiber-reinforced composite materials

Kwang-Pill Lee, Hae-Jeong Kang, Duck-Lae Joo and **Seong-Ho Choi**	473	Adsorption behavior of Urokinase by the polypropylene film with amine, hydroxylamine and polyol groups
Akira Idesaki, Masaki Narisawa, Kiyohito Okamura, Masaki Sugimoto, Yousuke Morita, Tadao Seguchi and **Masayoshi Itoh**	483	Application of electron beam curing for silicon carbide fiber synthesis from blend polymer of polycarbosilane and polyvinylsilane
Satoshi Shukushima, Hiroshi Hayami, Tomohito Ito and **Sei-ichi Nishimoto**	489	Modification of radiation cross-linked polypropylene
Seong-Ho Choi, Hae-Jeong Kang, Eun-Nyoung Ryu and **Kwang-Pill Lee**	495	Electrochemical properties of polyolefin nonwoven fabric modified with carboxylic acid group for battery separator
Seong-Ho Choi, Young Han Jeong, Jae Jeong Ryoo and **Kwang-Pill Lee**	503	Desalination by electrodialysis with the ion-exchange membrane prepared by radiation-induced graft polymerization
Isao Kaetsu, Hiroshi Nakayama, Kumao Uchida and **Kouichi Sutani**	513	Radiation curing of intelligent coating on biofunctional membranes

PHYSICS AND CHEMISTRY OF EXOTIC PARTICLES

Y. Miyake, K. Shimomura, S. Makimura, Y. Matsuda, P. Bakule, R. J. Scheuermann and **K. Nagamine**	521	Ultra-slow muon generation by laser resonant ionization towards the 21st century
Masaki Maekawa, Masakazu Kondo, Sohei Okada, Atsuo Kawasuso and **Hisayoshi Itoh**	525	Development of pulsed MeV positron beam line
M. Tashiro, Y. Honda, T. Yamaguchi, P. K. Pujari, N. Kimura, T. Kozawa, G. Isoyama and **S. Tagawa**	529	Development of a short-pulsed slow positron beam for application to polymer films
Takenori Suzuki, Kenjiro Kondo, Eisaku Hamada, Zhi Quan Chen and **Yasuo Ito**	535	Temperature and radiation effects on positronium formation
Tetsuya Hirade and **Takayuki Kumada**	541	The effect of γ-irradiation on positronium formation in polyethylene
C.L. Wang, Y. Kobayashi, K. Hirata, R. Suzuki, T. Ohdaira and **T. Mikado**	545	Nanometer-scale voids in PECVD silicon-oxide films probed by variable-energy positron lifetime spectroscopy: A comparison with infrared spectroscopy

Number 6

RADIATION PHYSICS

Ivan Michieli	551	Some properties of generalized secant integrals: extended definition and recurrence relations
N. Govinda Nayak, Gerald Pinto and **K. Siddappa**	555	Incoherent scattering of 59.54 keV γ-rays at small momentum transfers
Book review	565	

RADIATION CHEMISTRY

Mamed Mustafaev, Seval Bayülken, Erhan Ergen, A. Yimaz Erkol and **Nesrin Ardagil**	567	Radiation-induced formation of polyacrylic acid–protein covalent conjugates
J.C. Wren and **J.M. Ball**	577	LIRIC 3.2 an updated model for iodine behaviour in the presence of organic impurities

Annaluisa Fantola-Lazzarini and Ennio Lazzarini 597 Electron delocalization of metal electrons in Fe^{II} complexes by positronium spin conversion reactions

RADIATION PROCESSING

Mohd. Abdul Malek, Abdullah Renreng and Chon Sing Chong 603 Mechanistic model for bond scission in a polymeric system by radiation

John S. Forsythe, David J.T. Hill and A.K. Whittaker 609 The use of NMR for determination of new structures in irradiated TFE/PMVE fluoropolymers

John Hendri, Akihiro Hiroki, Yasunari Maekawa, Masaru Yoshida and Ryoichi Katakai 617 Permeability control of metal ions using temperature- and pH-sensitive gel membranes

Lu Jun, Li Jun, Yi Min and Ha Hongfei 625 Solvent effect on grafting polymerization of NIPAAm onto cotton cellulose via γ-preirradiation method

Wenfei Dong, Guangxin Chen and Wanxi Zhang 629 Radiation effects on the immiscible polymer blend of nylon1010 and high-impact strength polystyrene (II): mechanical properties and morphology

Li Yeping, Fang Yue-E, Fan Rong and Xing Jinyun 637 Study of plasma-polymerization deposition of $C_2H_2/CO_2/H_2$ onto ethylene-co-propylene rubber membranes

Guozhong Wu, Yosuke Katsumura, Norihisa Chitose and Zhihua Zuo 643 A pulse radiolysis study of oil/water microemulsions

Erratum 651

CONTENTS OF VOLUME 61

Number 1

RADIATION PHYSICS

C. Selvaraju, A. S. Bhullar and K. K. Sud 1 DWBA differential and total pair production cross sections for intermediate energy photons

Rıdvan Durak and Yuksel Özdemır 19 Measurement of K-shell fluorescence cross-sections and yields of 14 elements in the atomic number range $25 \leq Z \leq 47$ using photo-ionization

RADIATION CHEMISTRY

A. Jowko, K. Wnorowski, J. Kowalczyk and K. Wojciechowski 27 Kinetics of the OH radical formation in pulse radiolysis of Ar–H_2O gaseous mixtures

Cornelia Kammerer and Nikola Getoff 35 Cytostatic action of aspirin and its effect on mitomycin C activity. A study in vitro under irradiation

RADIATION PROCESSING

Cheorun Jo, Dong Uk Ahn and Myung Woo Byun 41 Lipid oxidation and volatile production in irradiated raw pork batters prepared with commercial soybean oil containing vitamin E

Kouichi Sutani, Isao Kaetsu and Kumao Uchida 49 The synthesis and the electric-responsiveness of hydrogels entrapping natural polyelectrolyte

B. L. Gupta, G. R. Narayan, S. R. Nilekani and R. M. Bhat 55 Irradiation temperature effect on glutamine (spectrophotometric readout) dosimeter

Yonghong Ni, Xuewu Ge, Huarong Liu, Xiangling Xu and Zhicheng Zhang 61 γ-Irradiation preparation of CdS nano-particles and their formation mechanism in non-water system

Chen Yanfeng and Yi Min 65 Swelling kinetics and stimuli-responsiveness of poly(DMAEMA) hydrogels prepared by UV-irradiation

Liu Ning, Yi Min, Zhai Maolin, Li Jiuqiang and Ha Hongfei 69 Radiation synthesis and characterization of polyDMAEMA hydrogel

Myong-Goo Lee and Young Chang Nho 75 Electrical resistivity of carbon black-filled high-density polyethylene (HDPE) composite containing radiation crosslinked HDPE particles

A. K. Pikaev, A. V. Ponomarev, A. V. Bludenko, V. N. Minin and L. M. Elizar'eva 81 Combined electron-beam and coagulation purification of molasses distillery slops. Features of the method, technical and economic evaluation of large-scale facility

Huarong Liu, Xuewu Ge, Yonghong Ni, Qiang Ye and Zhicheng Zhang 89 Synthesis and characterization of polyacrylonitrile–silver nano-composites by γ-irradiation

Number 2

RADIATION PHYSICS

Xiao-yan Liu, Gui-qin Li, Xue-shen Liu, Ying-kui Mu, Yi Wang and Pei-zhu Ding 93 Gauss numerical inversion for use in computing the radiation field from a cylindrically symmetric radiation source

G. Dattoli, A. M. Mancho, M. Quattromini and A. Torre 99 Exponential operators, generalized polynomials and evolution problems

RADIATION CHEMISTRY

T. Lundström, H. Christensen and K. Sehested 109 The reaction of hydrogen atoms with hydrogen peroxide as a function of temperature

Franco Cataldo and Dieter Heymann 115 Comparison of the soluble products from radiolysis and photolysis of CS_2

H. Schüssler, S. Navaratnam and L. Distel 123 Pulse radiolysis studies on histones and serum albumin under different ionic conditions

RADIATION PROCESSING

M. F. Barakat, K. El-Salamawy, M. El-Banna, M. Abdel-Hamid and A. Abdel-Rehim Taha 129 Radiation effects on some dyes in non-aqueous solvents and in some polymeric films

Elias Hanna Bakraji, Numan Salman and Haroun Al-kassiri 137 Gamma-radiation-induced wood–plastic composites from Syrian tree species

Sayed M. Badawy, Ahmad M. Dessouki and Horia M. Nizam El-Din 143 Direct pyrolysis mass spectrometry of acrylonitrile–cellulose graft copolymer prepared by radiation-induced graft polymerization in presence of styrene as homopolymer suppressor

Liu Pengfei, Zhai Maolin and Wu Jilan 149 Study on radiation-induced grafting of styrene onto chitin and chitosan

John Hendri, Akihiro Hiroki, Yasunari Maekawa, Masaru Yoshida and Ryoichi Katakai 155 The spatial effect of hydrophobic groups in pendant amino acid monomers on the thermal volume phase transition of hydrogels

Hong.-Sun Yook, Ju.-Woon Lee, Kyong.-Haeng Lee, Moo.-Kang Kim, Chi.-won Song and Myung.-Woo Byun 163 Effect of gamma irradiation on the microstructure and post-mortem anaerobic metabolism of bovine muscle

Le Xuan Tham, Naotsugu Nagasawa, Shinpei Matsuhashi, Noriko S. Ishioka, Takehito Ito and Tamikazu Kume 171 Effect of radiation-degraded chitosan on plants stressed with vanadium

Numbers 3–6

8TH INTERNATIONAL SYMPOSIUM ON RADIATION PHYSICS (ISRP - 8)

177 Preface

INVITED LECTURES

L. Bøtter-Jensen and A. S. Murray 181 Optically stimulated luminescence techniques in retrospective dosimetry

Thanasis Economou 191 Chemical analyses of martian soil and rocks obtained by the Pathfinder Alpha Proton X-ray spectrometer

Sylvian Kahane 199 Measurements of Rayleigh scattering and relativistic calculations of incoherent scattering functions

J. Klusoň 209 Environmental monitoring and in situ gamma spectrometry

M. Krčmar, Z. Krečak and A. Ljubičić 217 Search for hadronic axions

Arlene J. Lennox 223 Accelerators for cancer therapy

A. Lodini 227 The recent development of neutronic techniques for determination of residual stresses

Sean Langridge and Stephen W. Lovesey 235 Uses of neutron and X-ray beams to investigate magnetism

Marco Martini and Emanuela Sibilia 241 Radiation in archaeometry: archaeological dating

Kyoshi Nishijima 247 The Super-Kamiokande experiment

J. Novotný Jr., V. Spěváček, P. Dvořák, J. Novotny and T. Čechák 255 Three-dimensional polymer gel dosimetry: basic physical properties of the dosimeter

Yu. Ts. Oganessian 259 Towards the "islands of stability" of superheavy elements

S. C. Roy 271 Superheated liquid and its place in radiation physics

Alexander V. Shchagin	283	Current status of parametric X-ray radiation research
Robert Speller	293	Radiation-based security
F. Spurný	301	Radiation doses at high altitudes and during space flights
I. Štekl	309	Measurement of double-beta-decay—experiments TGV and NEMO
Claudio Tuniz	317	Accelerator mass spectrometry: ultra-sensitive analysis for global science
Bert Wolterbeek	323	Large-scaled biomonitoring of trace element air pollution: goals and approaches
T. Wroblewski	329	X-ray imaging using the radiation diffracted by polycrystalline materials

CONTRIBUTED PAPERS

Session A: Fundamental Processes in Radiation Physics

A. Akkerman, A. Breskin, R. Chechik and **Y. Lifshitz**	333	Calculation of proton stopping power in the region of its maximum value for several organic materials and water
J. P. J. Carney and **R. H. Pratt**	337	Existence of near-zero minima in elastic photon–atom scattering
R. Cesareo, F. Balogun, A. Brunetti and **C. Cappio Borlino**	339	90° Compton and Rayleigh measurements and imaging
C. T. Chantler	343	New theoretical investigation resolving discrepancies of atomic form factors and attenuation coefficients in the near-edge soft X-ray regime
C. T. Chantler, C. Q. Tran, D. Paterson, Z. Barnea and **D. J. Cookson**	347	Direct observation of scattering contributions in X-ray attenuation measurements, and evidence for Rayleigh scattering from copper samples rather than thermal-diffuse or Bragg–Laue scattering
G. De Ninno, D. Nutarelli, D. Garzella, L. Nahon, M. Hirsch, E. Renault, B. Visentin and **M. E. Couprie**	351	Gamma rays produced by inverse Compton scattering in the Super-ACO storage ring free electron laser
F. Teodori, J. E. Fernández and **V. Molinari**	353	The effect of geometry on the fluorescence radiation field
Zoran Kaliman and **Nada Orlić**	355	Nuclear excitation by positron annihilation with bound electrons in a screened atomic potential
M. Krčmar, Z. Krečak, M. Stipčević, A. Ljubičić and **D. A. Bradley**	359	The mean-free-path of monochromatic hadronic axions
Z. Krečak, M. Krčmar, S. Kaučić and **A. Ljubičić**	361	Method for experimental determination of β-decay end point energies
L. A. LaJohn and **R. H. Pratt**	365	Circumstances in which radiation is not absorbed, forbidding photo-ionization: four classes of matrix element zeros
Chea-Beng Lee, D. A. Bradley, Ithnin Abdul Jalil, Y. M. Amin, Mohd Jamil Maah and **Khairul Zaman M. Dahlan**	367	New measurements concerning a non-resonant photo-activation cross-section for ^{111}Cd
A. Mishev, E. Duverger, L. Makovicka and **J. Stamenov**	371	Modelling and study of the Cherenkov effect
Raj Mittal, Vandana and **Meenu Singh**	375	Method to evaluate empirical photoionisation cross-sections for $L3$ magnetic sub-states
V. R. K. Murty	379	Total photon cross sections for low energy photons in light elements
N. Govinda Nayak, Gerald Pinto and **K. Siddappa**	383	Incoherent scattering of 59.54 keV gamma rays for some rare earth elements at low photon momentum transfers
Nada Orlić and **Zoran Kaliman**	387	Mechanism for nuclear excitation during positron annihilation using Coulomb wave functions
Miroslav Pardy	391	The quantum electrodynamics of laser acceleration
S. Pašić and **K. Ilakovac**	395	An accurate absolute-scale measurement of bremsstrahlung following absorption of incident X- and γ-rays

S. Pašić and K. Ilakovac	397	Absolute-scale measurement of compton backscattering in germanium at 105.3 keV
T. Surić and R. H. Pratt	399	Ionization of an atom by photoabsorption at high photon energies: unified view in terms of singularities of the Coulombic potentials
A. M. Vlaicu, Y. Ito, K. Taniguchi, T. Mukoyama and T. Bastug	401	M-shell satellite structure of W X-ray emission lines
Y. Ito, T. Tochio, K. Mutaguchi, H. OhHashi, N. Shigeoka, Y. Nakata, A. M. Vlaicu, T. Uruga, S. Emura and J. P. Gomilsek	405	Double-electron excitation above Xe K-edge

Session B: Radiation Sources and Detectors

Youssef. A. Abdulla, Y. M. Amin and D. A. Bradley	409	The thermoluminescence response of Ge-doped optical fibre subjected to photon irradiation
E. P. Q. Alcón and R. T. Lopes	411	Slot scintillation detector modeling for digital radiography
M. Angelone, P. Batistoni and M. Pillon	415	Effect of the encapsulating material on the peak3/peak5 response ratio of TLD-300 irradiated with neutrons of various energy
Jorge S. Ayala-Arenas, Reneu L. Andrioli Jr, S. Watanabe, M. Matsuoka and B. C. Bhatt	417	Radiation effect on thermoluminescence and electron paramagnetic resonance (EPR) of pink beryl
T. Rivera, J. Azorín, C. Falcony, E. Martínez and M. García	421	Determination of thermoluminescence kinetic parameters of terbium-doped zirconium oxide
P. R. González and J. Azorín	425	Thermoluminescent response of LiF : Mg,Cu,P+PTFE prepared in Mexico to $^{90}Sr/^{90}Y$ beta particles
Mahmoud I. Abbas, Younis S. Selim and M. Bassiouni	429	HPGe detector photopeak efficiency calculation including self-absorption and coincidence corrections for cylindrical sources using compact analytical expressions
M. A. Bero, W. B. Gilboy and P. M. Glover	433	Radiochromic gel dosemeter for three-dimensional dosimetry
J. P. Pérez-Moreno, J. P. Bolívar, R. García-Tenorio, E. San Miguel, J. L. Aguado, J. L. Mas and F. Vaca	437	A simple method for efficiency calibration of HPGe detectors in γ-spectrometric measurements
P. Cauwels, B. Masschaele, W. Mondelaers, S. Baechler, J. Jolie and T. Materna	439	The development of a high-power bremsstrahlung radiator for the production of monochromatic X-rays
E. Cruz Z, A. Negrón, A. Ramos A, S. Ramos B, J. Hernández A, F Jaque and H. Murrieta S	443	Gamma coloration of mixed crystals of KCl–KBr doped with Pb^{2+}
E. Cruz-Zaragoza, S. Ramos-Bernal and A. Negrón-Mendoza	445	Dosimetry for low temperature measurements using single and poly-crystals
Mala Das, B. K. Chatterjee, B. Roy and S. C. Roy	447	Superheated drops of R114—as a neutron spectrometer
G. De Ninno, D. Nutarelli, D. Garzella, L. Nahon, M. Hirsch, E. Renault and M. E. Couprie	449	The super-ACO free electron laser source in the UV and itsapplications
M. Gombia, D. Bollini, J. E. Fernández, M. Gambaccini and V. Molinari	451	Improving tomographic images with a filtered projection in real space
E. Gargioni, L. Büermann and H.-M. Kramer	455	A new procedure for dose measurements in mixed high-energy electron and photon fields
I. Kuvvetli, C. Budtz-Jørgensen, L. Gerward and C. M. Stahle	457	Response of CZT drift-strip detector to X- and gamma rays
I. F. Gonçalves, E. Martinho and J. Salgado	461	Monte Carlo calculation of resonance self-shielding factors for epithermal neutron spectra
A. Loupilov, A. Sokolov and V. Gostilo	463	X-ray Peltier cooled detectors for X-ray fluorescence analysis
J. Jolie	465	Gamma ray spectroscopy with ultra-high precision
D. T. L. Jones	469	Monoenergetic neutron sources below 100 MeV
Sung Ho Park, Jong Kyung Kim and Jong Oh Kim	473	Simultaneous calibration of TLDs using the ICRU slab and photon beams

V. S. Kondrashov, S. J. Rothenberg and I. Petersone	475	Database driven analysis for nuclide quantification by gamma spectra
I. Krajcar Bronić and B. Grosswendt	477	Experimental study of gas mixtures in strong non-uniform electric fields
Z. Krečak, M. Krčmar and A. Ljubičić	479	Minimization of channel electron multiplier background counting rate
M. Lamoureux, P. Charles and C. Gaudin	481	Interest of thick-target bremsstrahlung for an innovative compact X-ray source
L. M. de Oliveira, A. M. Rossi and R. T. Lopes	485	Dose response of A-type carbonated apatites prepared under different conditions
R. H. Mahat, D. A. Bradley, Y. M. Amin, C. Y. Wong and L. D. Su	489	The effect of humidity on the accuracy of measurement of an electret radon dosimeter
E. S. Masunov, S. M. Polozov and A. S. Roshal	491	Undulator linear accelerator as a generator of ribbon high power ion beams
V. R. K. Murty and K. R. S. Devan	495	On the suitability of Peltier cooled Si-PIN detectors in transmission experiments
Abdullah M. Noh, Yusoff M. Amin, Rosli H. Mahat and D. A. Bradley	497	Investigation of some commercial TLD chips/discs as UV dosimeters
Anselmo S. Paschoa	501	Low gamma counting for measuring NORM/TENORM with aradon reducing system
S. Rollet	505	Energy deposition in the plasma-facing components of Ignitor
B. Roy, Mala Das, S. C. Roy and B. K. Chatterjee	509	Threshold temperature for γ-ray detection in superheated drop detector
G. Sarrabayrouse and V. Polischuk	511	MOS ionizing radiation dosimeters: from low to high dose measurement
A. X. da Silva and V. R. Crispim	515	Study of a neutron radiography system using ^{252}Cf neutron source
F. Spurný, A. G. Molokanov and B. Vlček	519	Spectrometry of linear energy transfer with track etched detectors
N. Takata	521	Differences between signal currents for both polarities of applied voltages on cavity ionization chambers
Shingo Taniguchi, Masashi Takada and Takashi Nakamura	523	Development of a new type multi-moderator neutron spectrometer
L. M. N. Tavora, W. B. Gilboy and E. J. Morton	527	Monte Carlo studies of a novel X-ray tube anode design
P. Christopher Selvin, S. Watanabe and J. S. Ayala-Arenas	531	Thermoluminescence and electron paramagnetic resonance (EPR) studies of mineral chrysocolla (dioptase)

Session C: Radiation in Physical and Material Sciences

W. E. Pöttker and C. R. Appoloni	535	Measurement of amorphous materials porosity by gamma-ray transmission methodology
Kulwant Singh, Gangandeep Kaur, G. K. Sandhu and B. S. Lark	537	Interaction of photons with some solutions
R. Chakarova and I. Pázsit	541	Evolution of ion induced point defects in silicon
Aniruddha Deb, M. Itou, Y. Sakurai, N. Hiraoka and N. Sakai	545	Spin-dependent electron momentum densities in Co_2FeGa studied by Compton scattering
M. Angelone, A. Esposito, M. Chiti and A. Gentile	547	Measurement of mass attenuation coefficients for four mixtures using X-rays from 13 keV up to 40 keV
F. Legarda and R. Idoeta	549	Monte Carlo transport of electrons and positrons through thin foils
I. Bolshakova, S. Krukovskii, D. Korbutiak, M. Skulsky and I. Zaverbnyi	553	Radiation resistance of GaAs–AlGaAs heterostructures doped with isovalent and rare-earth elements
R. Moreh and D. Nemirovsky	557	Testing the uncertainty principle using (n,γ) photon beams and pulsed neutron beams
N. Govinda Nayak, M. G. Vijaya and K. Siddappa	559	Effective atomic numbers of some polymers and other materials for photoelectric process at 59.54 keV

A. A. Othman	563	Photo-induced optical changes in amorphous GaS thin films
M. C. da Rocha, L. M. da Silva, C. R. Appoloni, O. Portezan Filho, F. Lopes, F. L. Melquíades, E. A. dos Santos, A. O. dos Santos, A. C. Moreira, W. E. Pötker, E. de Almeida, C. Q. Tannous, R. Kuramoto, F. H. de M. Cavalcante, P. F. Barbieri, A. F. Caleffi, B. T. Carbonari and G. Carbonari	567	Moisture profile measurements of concrete samples in vertical water flow by gamma ray transmission method
B. Ravat, R. Gschwind, M. Grivet, E. Duverger, A. Chambaudet and L. Makovicka	571	Energetic distribution of the electrons from a 200 keV beam in polyurethane layers : EGS4 calculation and FTIR analysis
A. Carradò, F. Fiori, E. Girardin, T. Pirling, P. Powell and F. Rustichelli	575	Neutron diffraction measurements of residual stresses in metal matrix composite samples
A. S. Sandhu and Kulwant Singh	579	Etching and annealing studies of nuclear tracks in glasses
Kazuo Shin and Hideo Hirayama	583	Calculation of gamma-ray buildup factors for two-layered shields made of water, concrete and iron and application of approximating formula
Changgeng Zhou, Zhengming Luo, Changhuan Tang and Zhu An	585	Measurement and analysis of K-shell X-ray production cross sections of V, Cr, Mn, Fe, Co, Ni, Cu and Zn elements by electron impact

Session D: Radiation in Medicine and Biology

A. W. Allday and M. J. Farquharson	589	Minimum detectable limits of measuring bone mineral density using an energy dispersive X-ray diffraction system
Indra J. Das, Alireza Kassaee, Frank Verhaegen and Vadim P. Moskvin	593	Interface dosimetry: measurements and Monte Carlo simulations of low-energy photon beams
D. Emfietzoglou, G. Papamichael and M. Moscovitch	597	Charged particle interactions in water: cross-sections andsimulation
M. J. Farquharson and A. P. Bagshaw	599	Monitoring body iron burden using X-ray fluorescence (XRF)
K. Geraki and M. J. Farquharson	603	An X-ray fluorescence system for measuring trace element concentrations in breast tissue
M. E. Poletti, O. D. Gonçalves, I. Mazzaro and H. Schechter	607	Evaluation of the influence of scattering profiles on the resolution, scatter/primary ratio, and grid performance in mammography
C. Guillerminet, E. Duverger, R. Gschwind, L. Makovicka, A. Monnier, F. Hamon and C. David	611	Theoretical and experimental study of spectral distortions at the output of an accelerator for medical use
D. T. L. Jones and A. N. Schreuder	615	Magnetically scanned proton therapy beams: rationales and principles
J. D. R. Lopes, V. R. Crispim and C. Lage	619	Identification of microorganisms for the analysis of imagesobtained by neutron radiography
B. Masschaele, S. Baechler, P. Cauwels, M. Dierick, J. Jolie and W. Mondelaers	623	First results of micro-neutron tomography by use of a focussing neutron lens
B. Masschaele, S. Baechler, P. Cauwels, P. Cloetens, M. Dierick, J. Jolie and W. Mondelaers	625	Element sensitive X-ray micro tomography for determination of the metal diffusion in teeth with amalgam fillings
M. E. R. Poli, S. A. Pereira and H. Yoriyaz	627	The use of Monte Carlo technique to optimize the dose distribution in total skin irradiation
Jack A. Simmons	629	Radiation risks from inhaled alpha emitters
A. Tartari, C. Baraldi and C. Bonifazzi	631	A model for Monte Carlo simulation of low angle photon scattering in biological tissues
C. R. Baker and S. J. Thomas	633	Neutron transport in a clinical linear accelerator bunker: comparison of materials for reducing the photo-neutron dose at the maze entrance

Session E: Radiation in Space, Earth and Environmental Sciences

A. C. Andrello, C. R. Appoloni, P. S. Parreira and M. F. Guimarães	635	A preliminary survey of soil erosion in a small basin in the Paraná State by using ^{137}Cs methodology
H. W. Baas, P. Bode and M. Blaauw	637	Ge detector efficiency calculations for determination of three-dimensional radioactivity distributions
D. Amrani and M. Belgaid	639	Some investigations and use of LR-115 track detectors for radon measurements
J. González-Labajo, J. P. Bolívar and R. García-Tenorio	643	Natural radioactivity in waters and sediments from a Spanish mining river
F. Z. Boujrhal, J. Carpena, R. Cherkaoui El Moursli and A. Chouak	645	A study of radon retention and fission track annealing with temperature in natural apatite
P. Cauwels, J. Buysse, A. Poffijn and G. Eggermont	649	Study of the atmospheric ^{85}Kr concentration growth in Gent between 1979 and 1999
O. K. Hakam, A. Choukri, Z. Moutia, A. Chouak, R. Cherkaoui, J.-L. Reyss and M. Lferde	653	Uranium and radium in groundwater and surface water samples in Morocco
G. De Angelis, M. Caldora, M. Santaquilani, R. Scipione and A. Verdecchia	655	Radiation exposure of airline crew members to the atmospheric ionizing radiation environment
M. M. Farinha, M. C. Freitas, S. M. Almeida and M. A. Reis	659	Some improvements in air particulate matter analysis by INAA
B. Ramsey, D. Sharma, H. Sipila, V. Gostilo and A. Loupilov	663	Gas filled prototype of a CdZnTe pixel detector
Zidan Mohamed M. Houmani, D. A. Bradley, Mohd. Jamil Maah and Zaharuddin Ahmed	665	Concentration of ^{210}Po, ^{226}Ra and ^{228}Ac in non-siliceous environmental materials
R. Isabey-Gschwind, L. Makovicka, D. Klein, E. Duverger and M. Voytchev	669	Development of thermoluminescent probe for natural radiation measurements in soil
S. S. H. Kasi	673	Cesium deposition in soil and its effects
B. Kozlowska, A. Hetman, J. Dorda and W. Zipper	677	Radon-enriched spring waters in the South of Poland
T. Lange and D. Hebert	679	A new site for ^{85}Kr measurements on ground water samples
J. Lartigue, R. Padilla, T. Martínez and M. Orta	681	EDXRF determination of Pb in aerosol samples from Mexico Valley
F. Legarda, C. Elejalde, M. Herranz and F. Romero	683	Distribution of fallout ^{137}Cs in soils from Biscay
A. Mamoon, M. A. Gomaa and S. M. Kamal	685	Surface disposal of ^{226}Ra contaminated gravel monitored by TLD and charcoal canisters
T. Martínez, M. Navarrete, L. Cabrera, P. González and A. Ramírez	687	Relationship between short and long term radon measurements
Fausto Medici	689	The IMS radionuclide network of the CTBT
F. L. Melquiades and C. R. Appoloni	691	Radiation of powdered milk produced at Londrina, PR, Brazil
A. C. Moreira, F. H. de M. Cavalcante, M. C. da Rocha, O. Portezan, M. M. Coimbra, F. R. E. Quiñones and C. R. Appoloni	693	Hydraulic conductivity of undeformed soil columns by gamma ray transmission
S. Semghouli, A. Choukri, R. Cherkaoui El Moursli, E. Jahjouh, A. Chouak, A. Ben Mohammadi, M. Latiris, J.-L. Reyss and J. L. Plaziat	697	Th/U dating of marine and continental mollusk shell, and travertine samples in quaternary deposits in Morocco
A. Senhou, T. El Khoukhi, A. Chouak, R. El Moursili Cherkaoui, A. El Yahiaoui and M. Lferde	701	Study of the accumulation of air pollution by the biological indicators, using 14 MeV neutron activation
S. Schlenker, D. Degering, S. Unterricker and G. Raben	705	Distribution of radionuclides in forest soils of varying pedochemistry
F. Vaca, G. Manjón and M. Garca-León	707	Natural radionuclides in an eucalyptus forest located in the south of Spain
Z. Zheng, J. Kazumi and T. D. Waite	709	Irradiation effects on suspended solids in sludge

Session F: Radiation in Archaeometry and the History of Art

C. R. Appoloni, F. R. Espinoza Quiñones, P. H. A. Aragão, A. O. dos Santos, L. M. da Silva, P. F. Barbieri, V. F. do Nascimento Filho and M. M. Coimbra	711	EDXRF study of Tupi–Guarani archaeological ceramics
M. Azougagh, A. Choukri, M. Lferde, R. Cherkaoui El Moursli, A. Chouak and M. Abrkan	713	Mollusc shell dating by uranium series method on quaternary material at Moroccan sea level
T. Čechák, J. Gerndt, L. Musílek and I. Kopecká	717	Analysis of fresco paintings by X-ray fluorescence method
G. Erfurt, M. R. Krbetschek, T. Trautmann and W. Stolz	721	Radioluminescence (RL) probe dosimetry using Al_2O_3:C for precise calibration of beta sources applied to luminescence dating
D. McLean, J. Robinson and M. Archer	723	Artefact reduction on CT images of fossils to allow 3D visualisation
L. Musílek, T. Čechák, M. Kubelík, K. Pavelka and M. Pavlík	725	The laboratory of quantitative methods in historic monument research at the CTU Prague
T. Čechák, J. Gerndt, P. Hiršl, P. Jiroušek, J. Kanaval, M. Kubelík and L. Musílek	729	Automation of TL brick dating by ADAM-1
V. Novotná, M. Kubelík and L. Musílek	733	Program for the evaluation of TL-brick dating: "ADAM-1-EVA"
A. Tartari, G. Maino, E. Lodi and C. Bonifazzi	737	ECOSP: an enhanced Compton spectrometer proposal for fresco inspection

Session G: Radiation Technologies and Industrial Applications

R. C. Barroso, M. J. Anjos, R. T. Lopes, E. F. O. de Jesus, S. M. Simabuco, D. Braz and C. R. F. Castro	739	Matrix characterization using synchrotron radiation X-ray diffraction
I. A. Bolshakova, S. Krukovskii, R. Holyaka, A. Matkovskii and A. Moroz	743	Ways of providing radiation resistance of magnetic field semiconductor sensors
D. Braz, R. C. Barroso, R. T. Lopes, M. J. Anjos and E. F. O. de Jesus	747	Evaluation of scatter-to-primary ratio in soil CT-imaging
A. Castellano, S. Quarta, G. Palamà, A. Brunetti and R. Cesareo	753	Radiographic films as a detection system for a CT-scanner
D. C. Creagh, V. Otieno-Alego and P. M. O'Neill	757	X-ray reflectivity and grazing incidence diffraction studies of the adhesion of protective wax coatings on metal surfaces
T. Čechák and L. Thinová	759	Sulfur content measurement in coal by X-ray fluorescence method
A. Chetaine, R. Sanchez and L. Erradi	763	The use of the characteristics method to solve the transport equation in unstructured geometries
A. X. da Silva and V. R. Crispim	767	Use of thermal neutron tomography for the detection of drugs and explosives
A. Negrón-Mendoza, S. Ramos-Bernal, E. Cruz and J. M. Juárez	771	Radiolysis of HCN in heterogeneous phase
L. Erradi, A. Htet and E. Chakir	773	Analysis of benchmarks on the reactivity temperature coefficient using new libraries based on ENDF/B-VI (release 5) and JEF2-2 data
L. Erradi and H. Essadki	777	Analysis of safety limits of the Moroccan TRIGA MARK II research reactor
B. Király, L. Oláh and J. Csikai	781	Neutron-based techniques for detection of explosives and drugs
R. D. Luggar, E. J. Morton, P. M. Jenneson and M. J. Key	785	X-ray tomographic imaging in industrial process control
J. R. Maiorino, S. A. Pereira, A. T. Silva and A. Santos	789	New proposal for the fast energy amplifier
C. Oliveira and J. Salgado	791	Isodose distributions and dose uniformity in the Portuguese gamma irradiation facility calculated using the MCNP code
L. Taranenko, F. Janouch and L. Owsiacki	795	Contributions to nuclear safety and radiation technologies in Ukraine by the Science and Technology Center in Ukraine (STCU)
S. A. Tjugum, G. A. Johansen and M. B. Holstad	797	The use of gamma radiation in fluid flow measurements

CONTENTS OF VOLUME 62

Number 1

RADIATION CHEMISTRY OF POLYMERS

1 Preface

FUNDAMENTAL STUDIES OF POLYMER RADIATION CHEMISTRY

B. H. Milosavljevic and **J. K. Thomas** 3 Effects of the degree of hydrolysis on radiation induced reactions in the poly(vinyl alcohol)–poly(vinyl acetate) system

David J. T. Hill, Christopher M. L. Preston, Daniel J. Salisbury and **Andrew K. Whittaker** 11 Molecular weight changes and scission and crosslinking in poly (dimethyl siloxane) on gamma radiolysis

Zheng Chang and **Jay A. LaVerne** 19 The gases produced in gamma and heavy-ion radiolysis of poly (methyl methacrylate)

T. R. Dargaville, D. J. T. Hill and **A. K. Whittaker** 25 An ESR study of irradiated poly(tetrafluoroethylene-*co*-perfluoropropyl vinyl ether) (PFA)

Jay H. Miller, Gordon Bolger and **Ellis Kempner** 33 Radiation target analysis of enzymes with stable free radicals

Akihiro Oshima, Shigetoshi Ikeda, Etsuko Katoh and **Yoneho Tabata** 39 Chemical structure and physical properties of radiation-induced crosslinking of polytetrafluoroethylene

MATERIALS PROCESSING AND OTHER RADIATION APPLICATIONS

Brigitte Defoort, Guy Larnac and **Xavier Coqueret** 47 Electron-beam initiated polymerization of acrylate compositions 4: effects of pulsed irradiation parameters on curing kinetics

Liming Dai 55 Radiation chemistry for microfabrication of conjugated polymers and carbon nanotubes

F. M. Houlihan, G. Dabbagh, I. Rushkin, R. Hutton, K. Bolan, E. Reichmanis, O. Nalamasu, Z. Yan and **A. Reiser** 69 Fundamental studies of dissolution inhibition in poly(norbornene-alt-maleic anhydride) based resins

Akihiro Oshima, Akira Udagawa and **Shigeru Tanaka** 77 Fabrication of polytetrafluoroethylene/carbon fiber composites using radiation crosslinking

Yoshinobu Izumi, Hiroshi Nagaike, Shigehiko Tabuse, Yoichi Yoshida and **Seiichi Tagawa** 83 Radiation grafting of styrene onto polyethylene

Loo-Teck Ng, John L. Garnett, Elvis Zilic and **Duc Nguyen** 89 Effect of monomer structure on radiation grafting of charge transfer complexes to synthetic and naturally occurring polymers

Bhavna D. Shirodkar and **Robert P. Burford** 99 Interpenetrating polymer networks based on a thermoplastic elastomer, using radiation techniques

Mirzan T. Razzak, Darmawan Darwis, Zainuddin and **Sukirno** 107 Irradiation of polyvinyl alcohol and polyvinyl pyrrolidone blended hydrogel for wound dressing

Jan-Michael Gosau, Larry A. Harrah and **Andrea E. Hoyt** 115 Polysilylene copolymers for ultrafast scintillator applications. 1. Evaluation of liquid formulations

Jan-Michael Gosau, Larry A. Harrah and **Andrea E. Hoyt** 127 Polysilylene copolymers for ultrafast scintillator applications. 2. Thin film formulations

STABILITY OF POLYMERS TOWARDS IRRADIATION

Yoshimasa Hama, Toshitaka Oka, Junichi Uchiyama, Hidenori Kanbe, Kenji Nabeta and **Fumio Yatagai** 133 Long-term oxidative degradation in polyethylene irradiated with ion beams

M. S. Jahan, M. C. King, W. O. Haggard, K. L. Sevo and **J. E. Parr** 141 A study of long-lived free radicals in gamma-irradiated medical grade polyethylene

Todd M. Alam	145	^{17}O NMR investigation of radiolytic hydrolysis in polysiloxane composites
M. Celina, K. T. Gillen, G.M. Malone, R. L. Clough and W. H. Nelson Jr.	153	Polymer materials and component evaluation in acidic-radiation environments
Sujita Pierpoint, Joseph Silverman and Mohamad Al-Sheikhly	163	Effects of ionizing radiation on the aging of polyester based polyurethane binder
Mark A. Alexander, Tri T. Le, David J. T. Hill, John W. Connell and Kent A. Watson	171	The behaviour of phenylphosphine oxide containing polyimides in a water plasma following γ-radiolysis
Shigehiko Tabuse, Yoshinobu Izumi, Takao Kojima, Yoichi Yoshida, Takahiro Kozawa, Miyako Miki and Seiichi Tagawa	179	Radiation protection effects by addition of aromatic compounds to *n*-dodecane
Sheila Devasahayam, David J. T. Hill and John W. Connell	189	A comparative study of the radiation resistance of four optically transparent polyimides
David J. T. Hill, Bong-Ku Choi, Hung-Kun Ahn and E-Joon Choi	195	An ESR study of the gamma radiolysis of aromatic polyesters containing isomeric naphthalene links

Numbers 2–3

RADIATION PHYSICS

Hem Prabha	203	Computation of rectangular source integral by rational parameter polynomial method
Technical note		
G. V. Pavlinsky and A. Yu. Portnoy	207	Calculating the spectral distribution of X-ray tubes with grounded cathode
Book review	215	

RADIATION CHEMISTRY

Ritsuko Watanabe and Kimiaki Saito	217	Monte Carlo simulation of water radiolysis in oxygenated condition for monoenergetic electrons from 100 eV to 1 MeV
Y. K. Bhardwaj, H. Mohan, S. Sabharwal and T. Mukherjee	229	Radiation effect on poly (*p*-sodium styrene sulphonate) of different degrees of polymerization in aqueous solution: pulse radiolysis and steady state study
Teruyuki Hakoda, Guo Zhang and Shoji Hashimoto	243	Chain oxidation initiated by OH, $O(^3P)$ radicals, thermal electrons, and O_3 in electron beam irradiation of 1,2-dichloroethylenes and air mixtures

RADIATION PROCESSING

J. Piekoszewski, A. G. Chmielewski, J. Licki, B. Sartowska, Z. Werner, S. D. Barson, P. Skeldon, G. E. Thompson, E. Richter, E. Wieser, I. Cerny, F. Hnilica and I. Furbacher	253	Laboratory-unit investigations of palladium-treated titanium foil for dry scrubber application
Branka Katušin-Ražem, Boris Novak and Dušan Ražem	261	Microbiological decontamination of botanical raw materials and corresponding pharmaceutical products by irradiation
Ren Jing, Zhang Yanqun, Li Jiuqiang and Ha Hongfei	277	Radiation synthesis and characteristic of IPN hydrogels composed of poly(diallyldimethylammonium chloride) and Kappa-Carrageenan
Zainuddin, David J. T. Hill and Tri T. Le	283	An ESR study on γ-irradiated poly(vinyl alcohol)
B. L. Gupta, S. R. Nilekani, G. R. Narayan and R. M. Bhat	293	Dose intercomparison for ^{60}Co, 10 MeV electrons and bremsstrahlung radiation using glutamine (spectrophotometric readout) dosimeter at different irradiation temperatures
	299	Corrigendum

Number 4

RADIATION PHYSICS

A. Akkerman, J. Barak, M. B. Chadwick, J. Levinson, M. Murat and **Y. Lifshitz** 301 Updated NIEL calculations for estimating the damage induced by particles and γ-rays in Si and GaAs

John Stalker 311 On Hubbell's rectangular source integral

RADIATION CHEMISTRY

Anjali Panda, Hari Mohan and **S. Sabharwal** 317 Pulse and gamma radiolysis studies of 3-sulfo propyl methacrylate in aqueous solutions

Zorana Tuce, Eberhard Janata, Marija Radojcic and **Bratoljub H. Milosavljevic** 325 A kinetic study of the mechanism of radiation induced agglomeration of ovalbumin in aqueous solution

Technical note

Al. Cecal, M. Goanta, M. Palamaru, T. Stoicescu, K. Popa, A. Paraschivescu and **V. Anita** 333 Use of some oxides in radiolytical decomposition of water

RADIATION PROCESSING

Bahattin Aydınlı and **Teoman Tinçer** 337 Radiation grafting of various water-soluble monomers onultra-high molecular weight polyethylene powder. Part II: Thermal, FTIR and morphological characterisation

Bahattin Aydınlı and **Teoman Tinçer** 345 Radiation grafting of various water-soluble monomers onultra-high molecular weight polyethylene powder. Part III: Preparation of compression moulded films, and water-uptake and morphological studies

YongXia Sun, Teruyuki Hakoda, Andrzej. G. Chmielewski, Shoji Hashimoto, Zbigniew Zimek, Sylwester Bulka, Anna Ostapczuk and **Henrietta Nichipor** 353 Mechanism of 1,1-dichloroethylene decomposition in humid air under electron beam irradiation

Numbers 5–6

RADIATION PHYSICS

Yosr E. E-D. Gamal and **M. M. Omar** 361 Study of the electron kinetic processes in laser-induced breakdown of electronegative gases over an extended wavelength range

Shivaramu, R. Vijayakumar, L. Rajasekaran and **N. Ramamurthy** 371 Effective atomic numbers for photon energy absorption of some low-Z substances of dosimetric interest

M. Misheva, N. Djourelov and **E. T. Nedkov** 379 Gamma irradiation effect upon positron annihilation in ultra high molecular weight poly(ethylene oxide)

RADIATION CHEMISTRY

Manmohan Kumar 387 Study of the formation of bimetallic aqueous Tl/Cu sols by gamma and electron irradiation

Shi Huai-Bin, Shao Chun-Lin and **Yu Zeng-Liang** 393 Preliminary study on the way of formation of amino acids on primitive earth under non-reducing conditions

Kaoru Matsuura and **Larry Kevan** 399 Stabilization and electron spin resonance characterization of $Ru(bpy)_3^{3+}$ and $Ru(bpy)_3^{+}$ by radiolysis of $Ru(bpy)_3^{2+}$ adsorbed on silica gel

RADIATION PROCESSING

Colette Patacz, Xavier Coqueret and **Christian Decker** 403 Electron-beam initiated polymerization of acrylate compositions 3: compared reactivity of hexanediol and tripropyleneglycol diacrylates under UV or EB initiation

M. Korkmaz and **M. Polat** 411 Radical kinetics and characterization of the free radicals in gamma irradiated red pepper

A. A. Abdel-Fattah, W. B. Beshir, E.-S. Hegazy and **H. Ezz El-Din** 423 Photo-luminescence of Risø B3 and PVB films for application in radiation dosimetry

Technical note

A. Saha, V. Chakraborty, R. K. Dutta and **S. N. Chintalapudi** 429 Carbon ion irradiation induced surface modification of polypropylene
